

CRITICAL COVER® COVERALL® FULL & HALF FACE SHIELDS

LIGHT SPLASH PROTECTION

FEATURES & BENEFITS

When you need total facial splash protection, choose the Coverall® face shield. The face shield's wrap-around design provides the wearer with great peripheral vision while acting as a protective shield against non-hazardous liquid splash and light particles in a Lab or Controlled Environment. The Coverall® face shield is not ANSI Z87 rated for eye protection. You can wear the lightweight shield comfortably for long periods and it fits easily over prescription glasses or protective eyewear. A double-sided anti-fog coating reduces the possibility of fogging in high humidity environments. For safe working conditions, the face shield is low distorting and 100% optically clear while a soft polyurethane foam headband securely positions the device on the wearer.

Available in two styles: full face shield and half face shield. Also available with an adjustable Velcro® band or elastic Comfort headband. Individually packaged.

Coverall Full Face Shields Styles/Sizes

Part No.	Description
2802	Full Face Shield w/Velcro Adjustable Band
2807	Full Face Shield w/Comfort Band

CRITICAL COVER® SHIELDMATE® MASK WITH EYE SHIELD

FEATURES & BENEFITS

Get eye and face splash protection and inhalation security in this top value design. The ShieldMate combination facemask and eye shield features a low glare, anti-fog treated, optically clear shield ultrasonically welded to the mask. An anti-fog foam strip on the mask eliminates eyewear fogging. The patented Magic Arch™ support strip holds the mask away from the nose and mouth to create a larger breathing chamber without limiting downward vision. This results in cooler, more comfortable performance for the wearer. ASTM F2100 Compliant Level 1 masks.
